STUDENTS' ERASMUS+ INTERNSHIP IN POLAND

2024-08-21

As part of the Erasmus+ project No. 2023-1-LT01-KA121-VET-000146758, from August 5 to 16, two students from the Social Work Assistant modular vocational training program completed an internship in Nowy Sącz, Poland.

The students carried out their internship at a hospice. The work was challenging both physically and emotionally, as it involved caring for seriously ill patients. The students were impressed by the dedication and strength of the staff working there. During the internship, they improved their practical professional skills as well as their personal, social, and learning-to-learn competencies. In their free time, the students explored the surrounding areas, visiting and admiring Zakopane and Kraków.

The internship in Poland was carried out under the Erasmus+ project No. 2023-1-LT01-KA121-VET-000146758.

Daugai Technology and Business School received Erasmus+ accreditation in 2022, valid until December 31, 2027, and will continue to conduct international mobility activities until the end of 2027. The Erasmus+ program is an excellent opportunity for vocational school students to gain theoretical and practical skills abroad, improve foreign language proficiency, and learn about life and culture in another country. It also motivates students to study and work in their chosen profession.
